

TO WHOM IT MAY CONCERN

Mr. **Alfons Gonzalez Perez** has been working in **Mavilor Motors** as his self employed company **Domotix.com** during **3 years, from beginning of 1999 to the end of 2001**, doing tasks of **computer engineer responsible of the IT department**.

His functions were:

- Migrate from the old centralised computer system to a new network schema.
- Designing, implementing and troublesshoting the company's computer network.
- Configuring network protocols to connect with the Internet.
- Give training to in-house electric installers to install the network cabling, required hubs and switches using STP cabling on the factory premises and UTP cabling at the offices.
- Choosing the right hardware and software to act as network servers and workstations providing access to a new ERP application.
- Developing an application for the repairing department.
- Handling issues related to the Y2K problem, in order to ensure service to our providers.
- Updating the computer systems to work with ISO 9002 rules, implementing traceability and enforcing users qualification and authorisations.
- Programming a new web site for www.mavilor.es
- Providing email addresses to all the employees.
- Provide training to all the employees to use the new network computing system under Microsoft Windows.
- Taking care as the responsible for the IT department.
- Engineering specific technical projects with our I+D team for international relationships purposes, related to software integration with electric robotic motors commanded through the Internet.

Mr. **Alfons Gonzalez** has excellent technical skills as a computer engineer with very satisfactory results.
